Nolte Hires Engineering Manager

Sacramento, CA– Nolte Associates, Inc. has hired Gary Reents, P.E., as an Engineering Manager in their Northern California water resources practice. With over 25 years of engineering experience and significant industry knowledge, Reents brings first-hand expertise in regional water resource issues, including flood plain management and drinking water, infrastructure management, wastewater, and storm water regulatory programs.

In his new role, Reents will be responsible for identifying issues and providing solutions to water resource, water supply, and flooding concerns held by various public sector agencies. He will also provide expertise regarding asset management and integrated infrastructure management. His duties include helping Nolte’s clients to navigate the regulatory programs and multi-jurisdictional environment associated with broad water resource programs.

Prior to joining Nolte, Reents spent the past 18 years with the City of Sacramento. Most recently serving as the Director of Utilities, he oversaw the water, sewer, drainage and solid waste services provided to over 400,000 Sacramento residents.

About Nolte Associates, Inc.

Established in 1949, Nolte is a full-service civil engineering firm delivering sustainable solutions for civil infrastructure. With more than 450 professionals in offices throughout the Western United States and Mexico, their staff includes engineers, planners and surveyors. Nolte is committed to implementing sustainable design practices in all specialties, including: flood control and drainage; land planning and development; structural engineering; surveying and mapping; traffic and transportation; water supply, distribution, conservation and treatment; wastewater engineering and water recycling; and construction and program management.
