**Nolte Names New Engineering Manager in Madera**

Sacramento, CA – Nolte Associates, Inc. is pleased to announce that it has hired Jim Burford, PE as Engineering Manager in its construction management group in Madera.

Burford brings more than 20 years of engineering experience with Caltrans on many different types of projects from concept to construction. Projects include new alignments, earthwork, asphalt, concrete, new structures, drainage, waste water treatment, emergency road repair, airport site work, and ESA roadside projects.

In his new role as engineering manager, Burford will be responsible for managing multidiscipline teams providing construction management and inspection services for complex transportation projects. He is currently serving as the resident engineer in charge of construction management services for the Wheeler Ridge Road interchange at Interstate-5 in Kern County.

Burford spent the last 22 years as a Resident Engineer and Transportation Engineer in the construction and design division of Caltrans. During that time he managed over \$340 million in completed highway construction projects.

*About Nolte Associates, Inc.*

Established in 1949, Nolte is a full-service civil engineering firm delivering sustainable solutions for civil infrastructure. With more than 550 professionals in offices throughout the Western United States and Mexico, their staff includes engineers, planners and surveyors.
