Gregory Ow to Lead Psomas Bay Area Water Team

Walnut Creek, CA (April 27, 2010)..... Psomas Gregory Ow has been tapped to lead the Psomas water team in the San Francisco Bay Area.

“Greg brings to Psomas’ Bay Area clients extensive design experience ranging from water distribution systems to water/wastewater treatments plants,” said Steve Winchester, head of the Psomas Water Group, in making the announcement. “In addition, he supplements that expertise with hands-on experience from both a construction and operations perspective, which results in a more easily constructed facility that is operator friendly.”

Ow has 30 years of civil engineering experience ranging from water treatment through program/construction management of complex public infrastructure projects. His experience includes the analysis, design and construction of treatment facilities, collection systems, and distribution systems for water, wastewater, recycled water, and stormwater projects. His practical knowledge stems from his hands-on experience as both a wastewater and water treatment plant operator.

Prior to joining Psomas, Ow was with Harris and Associates. In his 24 years with Harris, Ow served as the project manager and project engineer on numerous water transmission and distribution system master plans. In addition, his responsibilities included

the study and implementation of treatment process improvements and the design and construction of major capital improvements, including treatment plants and pipelines.

Ow is a member of the American Water Works Association, the American Public Works Association, the American Society of Civil Engineers, and the Construction Management Association of America.

A resident of Walnut Creek, California, Ow holds a Bachelor of Science Degree in Civil Engineering from and the University of California, Berkeley and a Masters Degree in Environmental Management from the University of San Francisco. He is a licensed civil engineer in the State of California.

Ow will be based in the Psomas Walnut creek office. He can be reached at (925) 937-3440 ext. 2150; gregory.ow@psomas.com.

About Psomas

Dedicated to balancing the natural and built environment, Psomas is one of the top-ranked consulting engineering firms in the nation. The firm serves clients in the transportation, water/wastewater, federal, and site development markets. Psomas' 500 employees provide services across the Western United States in water/wastewater and transportation engineering, site development civil engineering, land surveying, planning and entitlements, renewable energy, program/construction management, GIS, and natural resources. Psomas has offices throughout California, in Arizona, and Utah. For more information, visit www.psomas.com.
