Psomas Announces Bolden, McCarthy and Talafus as New Associates

Los Angeles, CA (April 27, 2010)..... Psomas is pleased to announce the appointments of Teddy Bolden, David McCarthy and Bob Talafus as Associates of the Firm.

Theodore Bolden II is vice president and a regional manager in charge of the Santa Clarita office. Bolden has over 30 years of experience in all aspects of land development in Los Angeles, Ventura and Kern Counties. His primary focus has been on land development, planning, and construction. As a senior project manager, Bolden has had the responsibility of due diligence to develop feasibility analysis, assisting with pro forma development, budget creation, and development of schedules to determine if a property is desirable for purchase.

Bolden received his degree in Urban and Regional Planning from Cal Poly Pomona University and resides in Palmdale.

David McCarthy, PE, is a Vice President with Psomas in our Phoenix office. McCarthy has 30 years of civil design and management experience in site development, infrastructure, drainage, transportation, public works, airports, and program management.. McCarthy is Psomas' lead engineer in alternative project delivery, including design-build, construction manager at risk, and public private partnerships. McCarthy is a member of the

Design Build Institute of America, Lean Construction Institute, Alliance for Construction Excellence, Associated General Contractors of America, and the Society of American Military Engineers. A resident of Phoenix, he is registered in seven states and with National Council of Examiners for Engineering and Surveying (NCEES).

Bob Talafus serves as team leader for civil engineering services for the Orange County office. He has over 28 years of experience in planning, entitlements, design, and construction administration of both public and private projects. Talafus' project experience includes serving as principal-in-charge and project manager for parks and recreation, public works, residential and commercial site design, site grading and paving design, roadway design, hydrology, storm drain design, water distribution systems, and sewer systems for numerous projects throughout Southern California. He resides in San Clemente.

About Psomas

Dedicated to balancing the natural and built environment, Psomas is one of the top-ranked consulting engineering firms in the nation. The firm serves clients in the transportation, water/wastewater, federal, and site development markets. Psomas' 500 employees provide services across the Western United States in water/wastewater and transportation engineering, site development civil engineering, land surveying, planning and entitlements, renewable energy, program/construction management, GIS, and natural resources. Psomas has offices throughout California, in Arizona, and Utah. For more information, visit www.psomas.com.
